YES ENERGY

UNPRECEDENTED VISIBILITY
INTO FTR MARKET POSITIONS
FTR POSITIONS DATASET

Financial Transmission Rights (FTRs) are extremely complex market instruments with enormous volumes of associated data. Historically, only FTR trading organizations with large IT budgets have been able to build systems to gain visibility into the positions of their competitors in the market. The FTR Positions Dataset provides this visibility, giving users access to the fastest available valuation for the entire market after each FTR auction and day-ahead market clearance. Built using an industry-standard mark-to-auction methodology used by some of the biggest FTR firms for many years, users can be confident they are getting accurate values for their accounting and strategy development needs. With FTR Positions Dataset, you can outsource expensive data management, including price revisions, model re-mappings, and inevitable market data reporting changes.

FTR Positions Dataset is available on Snowflake, allowing users to ask the hard questions of the data they never thought possible. Snowflake is a data warehouse available across multiple cloud platforms. It offers massive compute capabilities, ideal for this big dataset. Snowflake also allows you to integrate FTR Positions Dataset with other Yes Energy data, internal data, and other third-party data available on Snowflake, fueling powerful Big Data analysis.

YES ENERGY

DATA INSIGHTS THAT
POWER YOUR BUSINESS

CAPABILITIES

- Industry-standard methodology for marking and settling FTR positions
- Coverage of all positions in all of the US FTR markets
- Optimized system for speed of valuation after FTR auction and day-ahead clearances
- Management of key data details like model re-mappings, price revisions, and market data reporting changes
- Delivered on the powerful Snowflake cloud platform

ABOUT YES ENERGY

Yes Energy is the leader in power market data. Founded in Boulder, Colorado in 2008, Yes Energy set out on a mission to deliver nodal power traders powerful, insightful, actionable data - it now offers the most robust, high-quality data in the industry. Yes Energy creates innovative data solutions to power the businesses of not only nodal power traders, but also power marketers originators, asset developers, asset operators, and the Middle Office.

ABOUT SNOWFLAKE

Snowflake is the first and only cloud-native, cloud-based data warehouse. This cutting-edge technology allows for the replication and secure sharing of data without duplication. Snowflake makes Big Data analytics accessible to small business and large international companies alike. Snowflake also has a low barrier to entry and getting started is easy. You can sign up for a free 30-day Snowflake trial here.
