

UNLOCKING POWER MARKET INSIGHTS WITH VISUAL AND INTUITIVE ANALYTICS

POWERSIGNALS

Nodal markets are complex, unique, and constantly evolving. In this dynamic environment, it's crucial to have a solution at your fingertips that allows analysis of the complex network of components that make up the grid. Visualization can prove extremely helpful in operating in nodal markets - visualizing generation, transmission, congestion, and pricing allows you to form hypotheses about the variables driving market volatility and optimize trading strategies and performance.

Yes Energy's flagship product, PowerSignals, was built to provide nodal market participants with powerful, insightful, actionable, and intuitive market data. PowerSignals is fueled by the most comprehensive market data available. Look back through our historic market data dating back to the inception of each ISO market, or view real-time data within minutes of when the ISO or other primary data sources releases data. With Yes Energy's experts behind PowerSignals, you never have to worry about data corrections or updates, PowerSignals will automatically pull in the latest data.

PowerSignals is a dynamic and visual solution that allows you to visualize data linked to a market map of nodes, transmission lines, generation and transmission outages, constraints, and power plants. For further analysis, PowerSignals allows you to easily drill down into other maps, charts, and tables. PowerSignals transforms huge amounts of detailed market data into actionable insight.

CAPABILITIES

- Immerse yourself in comprehensive ISO market data
- Discover the best opportunities using visual analysis tools
- Develop trade strategies for Bal-Day, Virtuals, Spreads, and FTRs
- Tune your portfolio using integrated market analytics
