# Summit Learning Lab Topics

We are diving into more advanced workflows and tools in this Learning Lab. If you are a newer user or just need a refresher course on the basics, we encourage you to join one of our live 101 sessions before Summit. View the schedule and register for those here:

<https://info.yesenergy.com/yes-energy-learning-lab-registration>

RT Market Monitoring and Analysis	Learn how to leverage our lowest latency solutions to monitor the Real Time market using Yes Energy Live Power, PowerSignals and QuickSignals solutions.
DataSignals API and Cloud Basics	Lay the foundation for navigating and querying data in Yes Energy's DataSignals API and Cloud products, including primary attribute views, price and load views and the time series framework.
Getting a Jump on the Day Ahead Market	Step through a workflow from the perspective of a Day Ahead trader with modules such as Like Day, Outage and Constraint Analysis and Daily Portfolio Analysis.
Maximizing your FTR Portfolio with PowerSignals	Explore all of the FTR focused modules so you can seamlessly create and manage your Portfolios in PowerSignals.

## Afternoon Breakouts

Breaking Down Price Events with Yes Energy	Use PowerSignals and Live Power to break down summer price volatility in CAISO.
Adventures in Data Exploration in Yes Energy	Discover tips and tricks for exploring Yes Energy's data catalog so you can quickly find the data you need in PowerSignals, DataSignals API and DataSignals Cloud.
Managing Risk with Position Management	Learn more about Yes Energy's Position Management product that enables you to effectively manage and track PnL and risk associated with FTR, Virtual and Spread portfolios.
DART Constraints and Base Facilities in PowerSignals	Take advantage of Yes Energy base facility Shift Factors to compare DA and RT Constraints and assess exposure due to under or overmodeling of constraints in the DA market.
