

Coast-to-Coast Coverage

- Coverage includes all 7 US ISOs: CAISO, ERCOT, MISO, NEISO, NYISO, PJM, SPP
- Over 500 GW of monitored generation
- Growing coverage of LNG, crypto, and data centers

60 Second Granularity

- Fastest-in-industry generation, transmission, and load data
- Stay ahead of market moves with real-time visibility into the rapidly changing grid

Integration that supports full grid analysis

- Live Power data is fully integrated within Yes Energy power analytic tools
- Enables seamless analysis of market dynamics and price shifts

See sudden plant outages that impact prices

- Live Power showed generation crash at Clay Boswell right before price spikes and then showed generation ramping up 20 hours ahead of full output – allowing traders to anticipate that real-time prices on July 11 and 12 would likely come in below day-ahead prices.
