

Submission Services™

EMPOWER YOUR WORKFLOW

Submission Services™ takes the guesswork out of day-ahead virtual and spread trade submission. It empowers you to build, analyze, validate, and submit your day-ahead virtual and spread trades within one solution. This is all delivered to you through a visual portfolio analysis dashboard and an easy to integrate data API.

The solution ensures you align to and fulfill ISO bid requirements with comprehensive validation logic being directly embedded and enabled in the submission process. This provides a competitive edge, as you can more quickly compile and submit your portfolios to the market. It also works to avoid portfolios that may be suboptimal or not balanced from a risk perspective.

Submission Services ensures that you have a standardized trade identification, analysis and submission (and corresponding withdrawal) processes. You no longer need to know how each individual ISO market bidding process works, leading to more efficient onboarding for new markets/traders and a faster trade submission process overall.

This is all part of Submission Services providing exceptional performance in trade execution and validation. Put our knowledge and expertise to work for you so that you can keep the focus on maximizing your return in the Day Ahead market.

Capabilities

- Build and analyze your portfolios using our market leading trade discovery solutions: PowerSignals® and DataSignals®
- Validate and submit portfolios with the click of a button or with full automation
- Receive your day-ahead clearances directly upon market clearing

SEAMLESSLY BUILD, ANALYZE, VALIDATE AND SUBMIT YOUR TRADES
