

New Builds Dataset

INSIGHTS INTO POWER MARKET NEW BUILDS AND RETIREMENTS

The New Builds Dataset is the deepest and the most thoroughly researched database of all energy infrastructure projects in North America. This dataset gives customers access to deep insights into the ever-changing status of planned generation, transmission & distribution, and load center (ex: industrial, data centers, bitcoin) facilities coming online or retiring across the U.S.

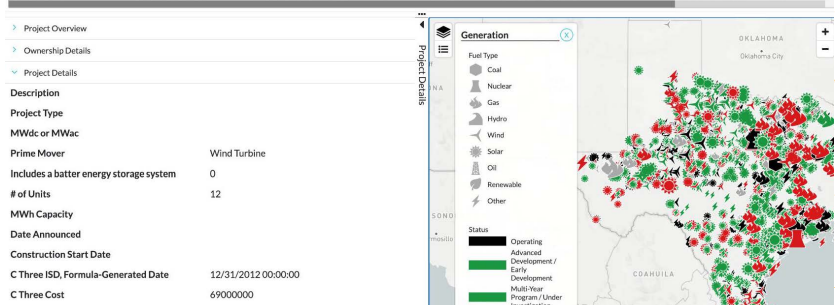

By incorporating new build projects into their analysis, asset developers and investors can better understand upcoming changes to supply and demand that might impact asset revenue while traders can better understand how grid changes may impact long-term positions.

Data Coverage

Comprehensive new project data procured from over 2000 sources including:

- Over 7,000 generation projects
- Over 11,000 transmission projects
- Over 1,300 data center and crypto mining projects
- Upcoming retirements across generation and transmission space

Project or Unit Name	Holding Company or Parent Organization	Intermediate Subsidiary	Nameplate Capacity (MW)	State or Province	County	Project Status	Reported In Service Year	Reported In Service Month	C Three In Service Date	Number of Units

DATA INSIGHTS THAT POWER YOUR BUSINESS

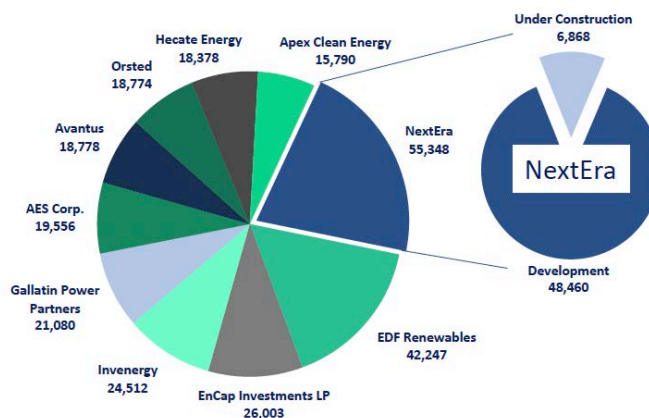

Data Features

Key data for projects including:

- o Location
- o Project type
- o Ownership information
- o Status / Status history
- o Plant / Line characteristics & equipment information
- o Timeline
- o PPA / Offtake information for plants
- o Related news

About Yes Energy®

Yes Energy is how traders, power companies, and asset managers and developers can finally make sense of the complex, rapidly changing power market. Supported by best-in-industry customer support, you get up-to-date data, comprehensive tools, and a specialized partner to help you make the right decisions every day. It's time to Win the Day Ahead™ and only Yes Energy brings you the unique combination of better data, better delivery, and better direction you need to do that.

Primary Energy Source	Subsidiary or Utility	Nameplate Capacity (MW)
