

Infrastructure Insights Dataset

INSIGHTS INTO POWER MARKET INFRASTRUCTURE CHANGES

The Infrastructure Insights Dataset is the deepest and the most thoroughly researched database of all energy infrastructure projects in North America. This dataset provides customers with comprehensive insights into the dynamic status of major upgrades, new projects, and retirements of generation, transmission, distribution, and load center facilities (e.g., industrial sites, data centers, bitcoin operations) across the U.S.

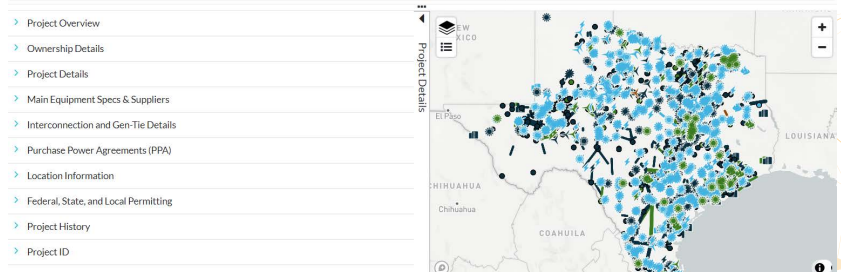

By incorporating infrastructure projects into their analysis, asset developers and investors can better understand upcoming changes to supply and demand that might impact asset revenue while traders can better understand how grid changes may impact long-term positions.

Data Coverage

Data procured from over 2,000 sources, dataset includes:

- Over 50,000 generation projects
- Over 55,000 transmission and distribution projects
- Over 6,000 load center projects including industrial, data centers, and bitcoin
- Upcoming retirements across generation and transmission space

DATA INSIGHTS THAT POWER YOUR BUSINESS

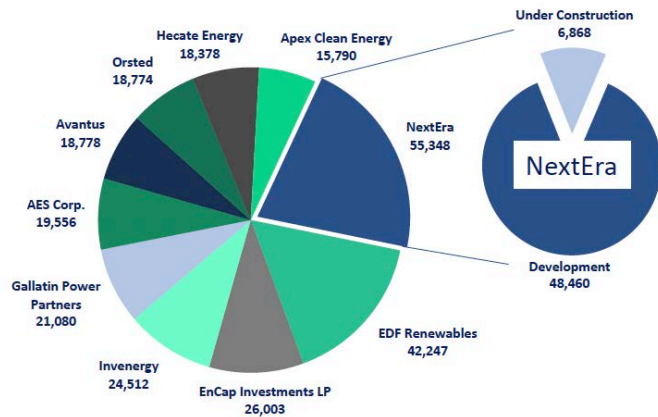

Data Features

Key data for projects including:

- Location
- Project type
- Ownership information
- Status / Status history
- Plant / Line characteristics & equipment information
- Timeline
- PPA / Offtake information for plants

About Yes Energy®

Yes Energy is how traders, power companies, and asset managers and developers can finally make sense of the complex, rapidly changing power market. Supported by best-in-industry customer support, you get up-to-date data, comprehensive tools, and a specialized partner to help you make the right decisions every day. It's time to Win the Day Ahead™ and only Yes Energy brings you the unique combination of better data, better delivery, and better direction you need to do that.

Primary Energy Source	Subsidiary or Utility	Nameplate Capacity (MW)
	(formerly 8minute Solar Energy)	150
