PowerCore™

ESSENTIAL FRONT-TO-BACK OFFICE SOFTWARE FOR MARKET PARTICIPANTS

PowerCore™ is a mission-critical solutions platform that redefines and amplifies success in energy market participation. PowerCore delivers the lowest total cost of ownership (TCO) and greatest return on investment (ROI) of any bid-to-bill software system.

Developed and supported by Power Settlements (part of Yes Energy), PowerCore is a multi-component, integrated, web-based tool that enhances how energy companies manage their bid-to-bill operations in ISO/RTO-controlled markets. PowerCore delivers a long list of benefits including:
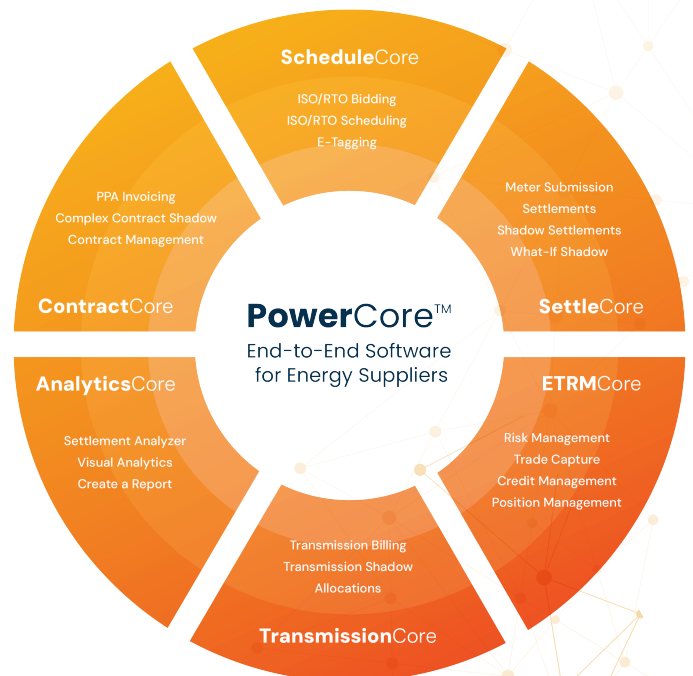

Rapid deployment based on today's needs with easy scalability as enterprise requirements grow.
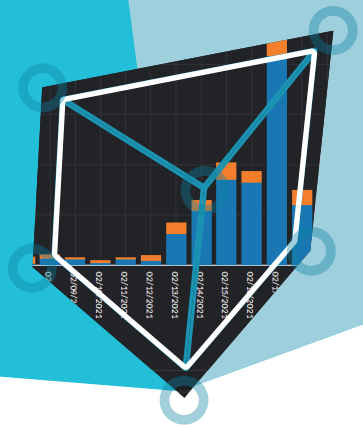

Business-optimizing impacts that are seen quickly. Most clients reporting significant bottom-line results in the first year of use.

PowerCore is an indispensable tool for energy suppliers that must navigate extraordinarily complex market terrain incorporating volatile conditions, 24/7 operations, and an ever-changing set of rules, policies, procedures, and workflows.

- Renewable Project Developers
- Battery Storage Operators
- Balancing Authorities

What Customers Say

"Power Settlements' technology is one-of-a-kind. We were at first overwhelmed with the amount of data used in the structured markets to determine and calculate charge codes, but PowerCore™ accelerated our position from novice to intermediate on day one. It delivers a level of trust and expertise that makes it ideal for any level of user right out-of-the box."

Tara Davis, *Energy Services Administrator*
Arizona Electric Power Coop

ABOUT POWER SETTLEMENTS

Founded in 2007 and headquartered in Glendora, California, Power Settlements is a proud member of the Yes Energy family of companies.

Power Settlements partners for the long-term with a diverse array of energy suppliers to streamline and automate their operations to meet their performance, growth, and sustainability objectives.

Power Settlements' PowerCore™ platform is a best-in-class solution accompanied by a multi-component service and the industry's best client support. Together, they ensure optimal performance in a complex market terrain incorporating volatility, 24/7 operations, and ever-changing rules, policies, and workflows.
